Inventor of the cell phone

The concept of a handheld phone was in his brain as a child and, with the help of a team from Motorola, the first mobile phone headset was born in 1973.

THE WORLD'S FIRST MOBILE PHONE WAS DESIGNED BY THE MOTOROLA BRAND AND HAD NOTHING TO DO WITH CURRENT MODELS. THE BRAND LAUNCHED IT ON THE MARKET ON MARCH 13, 1983 AND HAD CHARACTERISTICS FAR REMOVED FROM WHAT COULD BE CONSIDERED AS COMFORTABLE AND ACCESSIBLE. IT WEIGHED ALMOST 1 KILOGRAM, AND MEASURED 33 BY 4.5 BY 8.9 CENTIMETERS. IN ADDITION, IT WAS NOT AVAILABLE TO MOST PEOPLE SINCE ITS PRICE WAS QUITE HIGH: \$ 3,995 AT THE TIME. DESPITE THIS, A YEAR LATER 300,000 PEOPLE IN THE WORLD ALREADY HAD THE DYNATAC.

The first cell phone

The world's first mobile phone was designed by the Motorola brand and had nothing to do with current models. The brand launched it on the market on March 13, 1983 and had characteristics far removed from what could be considered as comfortable and accessible.

It weighed almost 1 kilogram, and measured 33 by 4.5 by 8.9 centimeters. In addition, it was not available to most people since its price was quite high: \$ 3,995 at the time.
